

One to One Engagement at Scale

AI automation increases engagement, revenue, and productivity by creating a personal interaction through simple, customized messaging

INTELLIGENT AUTOMATION

Virtual Assistant. Real Results.

Our automated assistants are powered by humanized artificial intelligence software, are virtually indistinguishable from humans, and take the place of your traditional business development people. Assistants provide real, two-way engagement with NLP-powered automated responses that align with your operational sales and support goals.

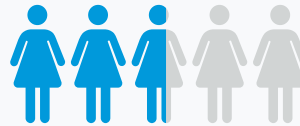

Your assistant interacts and learns like a human with the added consistency, efficiency, and productivity of a machine to magnify your team's efforts and do more with less.

“People will call and ask for Palmer (AI Assistant); that’s how real she seems. She’s easily my least expensive and most productive employee.”

ENGAGING WITH INVALID DATA

Our AI Assistant received a 48% response rate from 2,500 untouched contacts with invalid phone numbers

POSITIVE REENGAGEMENT

In a list of 2,347 contacts with 20+ prior engagement attempts, the Assistant earned a 52% response rate

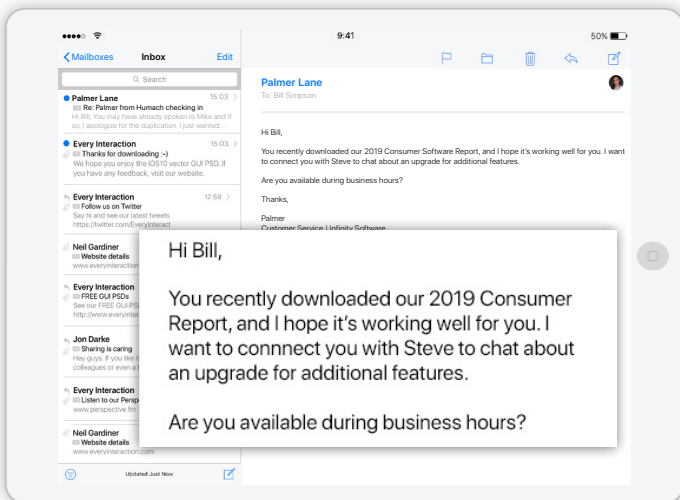

*Results from a 38 day period

STAY CONNECTED 24/7/365

Boost productivity and performance

Most automated outreach is designed to control the conversation and convey a mass message which can lead to low response rates. Our humanized AI assistants increase engagement by putting your contacts in control.

- **FOSTER REAL CONVERSATIONS**
Assistant engage in friendly, adaptable, two-way conversations designed to set up calls, not drive hard sales
- **GATHER BUSINESS INTELLIGENCE**
Contacts respond more readily and share critical feedback and information like phone numbers and best times to call
- **IMPROVE YOUR PRODUCTIVITY**
AI assistants secure more quality touch-points in one hour than your sales and marketing teams combined

The New Way To Sell

Focus your time and money generating revenue and supporting your organization. See how each interaction with an AI assistant maximizes the efforts and opportunities of your team.

SEE AI IN ACTION

Responsive Reengagement

The largest professional healthcare organization in the U.S. uses AI to improve lead management and increase sales of membership programs and publications that support its over 240,000 members.

AI VS HUMANS

AI assistants are always live, always engaging, and infinitely scalable for maximum efficiency at half the cost

STEP 1: ENGAGE

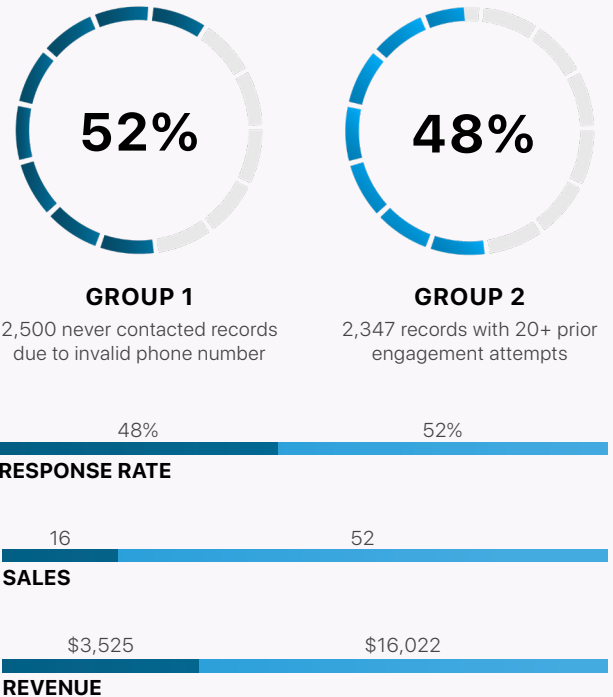

In 38 days, the AI assistant engaged directly with 4,847 non-engaged contacts, made a total of 33,929 interactions, and received a 50% response rate.

STEP 2: QUALIFY

The assistant identified and escalated 158 sales opportunities, 656 new phone numbers, new points of contact, and new customer service opportunities.

STEP 3: RESULTS

Human agents made 68 total sales generating over \$19,547 in total revenue (\$289.46/hr).

An Assistant for Every Need

Your AI automated assistant doesn't just drive sales and support customers, she can be tailored to promote any B2B or B2C outreach for your organization

INTELLIGENT ENGAGEMENT

Your assistant initiates personal engagement and tailors the conversation to elicit a response

NATURAL LANGUAGE PROCESSING

AI interprets, learns, and drives the conversation backed by human tuning

INSTANT ESCALATION

Once the conversation has reached the desired outcome, a member of your team is notified

DEPENDABLE FOLLOW UP

Your assistant follows up to ensure the contact was reached and satisfied with their experience
